PROFILE

Software Engineering student (7th Semester, Expected Graduation: 2025–26) at Sindh Madressat-ul-Islam University with hands-on experience in full-stack development, DevOps pipelines, and mobile security applications. Built notable projects including SecureVault (encrypted Flutter app) and an Automated Recovery Simulation Tool. Seeking a backend or DevOps role where I can apply skills in Python, Docker, AWS, and CI/CD automation to solve real-world problems.

EDUCATION

Bachelor of Software Engineering <i>Sindh Madressat-ul-Islam University, Karachi</i>	7th Semester (Ongoing) Expected 2025–26
Intermediate (Pre-Engineering) <i>176 Govt. Higher Secondary School & College, Sanghar</i>	A1 Grade 2021–2022
Matriculation <i>176 Govt. Higher Secondary School & College, Sanghar</i>	A1 Grade 2020

TECHNICAL SKILLS

DevOps & Cloud: Git • GitHub • GitLab • Docker • Jenkins • GitHub Actions • AWS EC2 • AWS S3 • Chef
Programming: Python • JavaScript • HTML/CSS • SQL • Dart (Flutter) • C++
Frameworks & Libraries: Flask/Django (basics) • Tkinter • Flutter • BeautifulSoup • Scrapy
Databases: MySQL • SQLite
Design & Tools: Figma (wireframes, mockups, prototypes) • VS Code • Postman • Jira • Trello • Excel
SE Practices: SDLC (Waterfall, Agile, Scrum) • SRS • Use Cases • User Stories • Traceability Matrices
Currently Learning: Django (advanced) • REST APIs • System Design

PROJECTS

Automated Recovery Simulation Tool <i>Personal Project • In Progress</i>	2026 – Present
- Built a simulation tool that automates system failure detection and recovery workflows, reducing simulated manual recovery time by ~40% in test scenarios. - Designed logic for automated rollback and health-check sequences using Python scripting. - Demonstrates applied knowledge of DevOps reliability principles and fault-tolerance patterns.	
SecureVault – Flutter Security App <i>Academic / Personal Project</i>	2025
- Developed a secure mobile app using Flutter for AES-encrypted storage of passwords and private notes. - Implemented client-side encryption ensuring zero data exposure even on device compromise.	
Food Delivery Mobile App <i>Personal Project • In Progress</i>	2024 – Present
- Designing a full-featured food ordering and delivery app with Figma UI/UX and backend API development. - Applying Agile methodology (Trello) for sprint planning across design and development phases.	
Urdu Poetry Desktop App <i>Academic Project • Tools: Python (Tkinter, Pandas), BeautifulSoup, Excel</i>	2024
- Built a Tkinter GUI to browse Urdu poetry by multiple poets; scraped and cleaned 1,000+ entries using BeautifulSoup/Scrapy. - Added search and filter features enabling dynamic, user-friendly navigation of the poetry dataset.	
Bank Management System	2024

Academic Project • Tools: Python, SQLite/MySQL

- Created a Python banking system supporting account creation, deposits, withdrawals, and balance inquiries.
- Managed relational data with SQLite/MySQL; focused on data validation and clean code structure.

Maze Runner Game – UI Design 2023

Academic Project • Tools: Figma, 2D Animation

- Designed a complete 2D game interface in Figma with high-fidelity mockups and interactive prototypes.
- Applied visual hierarchy, layout consistency, and intuitive gameplay flow principles.
